DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1-7, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Douglas US 6,090,128.

Douglas discloses a prosthetic device (30) comprising a plurality of stents (42) having eyelets (49) at each end of each stent. Each stent is covered by a graft (32) from end to end (along the inside surface of each stent) and folded at one end of the implant (see Fig. 4) along the outer surface of at least one stent. Additionally, each stent is connected to each stent and sutured to the graft by a biocompatible filament (see Fig. 2). Finally, Douglas discloses a graft made of collagen (see col. 2, lines 37-41).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3738

Claims 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Douglas US Patent 6,090,128 in view of Cook et al US Patent 6,206,931.

Douglas discloses the invention substantially as claimed. however, Douglas does not disclose a graft made out of a submucosa tissue and a graft having a seam.

Cook et al teaches a graft having a seam and made out of a submucosa tissue for the purpose of increasing the biocompatibility of the implant.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the graft of the Douglas reference with the graft of the Cook et al reference in order to increase the biocompatibility of the implant and reduce the probability of rejection by the body.
